## Skills

---

- **Programming Languages** : Java, Javascript, HTML, CSS
- **Libraries and Frameworks** : Spring Boot, JUnit, React
- **Tools** : MySQL, Microservices, AWS, REST API, SQL, Git, GitLab CI

## Experience

---

**Software Development Engineer**, MountBlue Technologies Apr 2026 - Present

- Working on full-stack JavaScript development with daily problem-solving, assignments, and collaborative code reviews.
- Building real-world projects while strengthening core engineering fundamentals.

**Software Engineer**, AJA Consulting Services LLP Sep 2024 - Dec 2024

- Completed backend training on Java, Spring Boot, and MySQL for enterprise web application development.
- Built and tested REST APIs for CRUD operations as part of internal project simulations.
- Worked on SQL queries, debugging, and code fixes under the mentorship of senior developers.
- Assisted in deployment readiness checks and maintained technical documentation.

**Freelancing**, Cosmoverge Oct 2023 - Aug 2024

- Debugged and optimized Java backend reporting system, fixing 36+ Jasper Reports runtime errors and achieving 100% production stability.
- Refactored Spring Boot expression engine, cutting report generation time by 40% with efficient MySQL data binding.

**Software Engineer**, Capgemini Jan 2022 - Sep 2023

### Project 1:

- Developed and implemented RESTful APIs using Java and Spring Boot to manage inventory data effectively.
- Built and integrated APIs to enable seamless communication between front-end and backend systems.
- Deployed applications on AWS EC2 with S3 storage, ensuring high availability and robust security.
- Created concise API and deployment docs to support team collaboration and maintenance.

### Project 2:

- Designed and developed a robust backend using Java and Spring Boot, implementing RESTful APIs for order booking, tracking, and delivery updates.
- Created efficient database schema in MySQL to handle complex relationships between couriers, customers, and agents.
- Authored detailed technical documentation for APIs, work-flows, and deployment processes, enabling easier maintenance and scalability.

## Projects

---

### Closest Cars - Car Booking Application

- Built RESTful APIs for real-time car booking and tracking, cutting API latency by 60% using Redis caching and Kafka-based event streaming. **Technologies Used:** Java, Spring Boot, Microservices

## Achievements

---

- Received Star Performer Award and cash prize for exceptional performance at Capgemini.
- Winner in Google Devfest , showcasing excellence in WebDevelopment Quiz.

## Education

---

Punjab Technical University, B.Tech in Computer Science
