Professional Summary

Results-driven Java Developer with 2 years of experience in designing, developing, and maintaining robust technology solutions. Proficient in Java, Spring Boot, RESTful APIs, and microservices architecture. Strong expertise in SQL schema design, query optimization, and managing complex database transactions. Skilled in applying design patterns and SOLID principles to deliver scalable, maintainable, and high-performance applications. Experienced across the Software Development Life Cycle (SDLC), with a strong focus on analytical problem-solving, technical decision-making, and delivering high-quality business solutions.

Technical Skills

- **Programming Languages:** Java 8
- **Frameworks:** Spring Boot
- **Databases:** MySQL
- **Cloud & Tools:** Git, Maven, JUnit, Mockito, Linux, Jasper Reports
- **Others:** RESTful APIs, Microservices, System Design, Unit Testing

Professional Experience

Backend Engineer Trainee

AJA Consulting Services LLP, Hyderabad

Sep 2024 – Dec 2024

- Completed backend training on Java, Spring Boot, and MySQL for enterprise web application development.
- Built and tested REST APIs for CRUD operations as part of internal project simulations.
- Worked on SQL queries, debugging, and code fixes under mentorship of senior developers.
- Assisted in deployment readiness checks and maintaining technical documentation.

System Analyst | Software Engineer

Capgemini, Hyderabad

Jan 2022 – Sep 2023

Project 1:

- Developed RESTful APIs using Java and Spring Boot for inventory management modules.
- Integrated backend services with front-end applications for smooth data exchange.
- Assisted in release activities, post-deployment validation, and issue resolution in cloud environments.
- Prepared API documentation and support guides for development and maintenance teams.

Project 2:

- Designed and developed backend services using Java and Spring Boot, implementing RESTful APIs for order booking, tracking, and delivery updates.
- Developed and optimized MySQL queries, stored procedures, and data handling logic to support courier, customer, and agent workflows.
- Participated in debugging, testing, and enhancing existing microservices to improve system performance and reliability.

- Delivered backend development and production support for Java and Spring Boot applications.
- Diagnosed and resolved 36+ Jasper Reports runtime issues, achieving stable and error-free production report execution.
- Refactored Spring Boot report processing logic, improving report generation performance by 40% through optimized MySQL data binding.
- Collaborated with clients to troubleshoot production issues, implement fixes, and enhance overall system reliability.

Projects

Movie Booking System

- Developed a Movie Booking System using Java, Spring Boot, and microservices architecture to support scalable backend operations.
- Designed and implemented RESTful APIs for movie listings, seat reservations, booking management, and user workflows.
- Integrated MySQL database operations to ensure efficient data storage, retrieval, and transaction handling.
- Enhanced backend performance, error handling, and service communication to ensure reliable system execution.

Education

Punjab Technical University

Bachelor of Technology in Computer Science

Achievements

- Received Star Performer Award at Capgemini for outstanding contributions and high-performance delivery.
- Winner of Google Devfest 2021 Web Development Quiz.
